## Academic Projects

- Title** : **Food Delivery**
- Platform** : MERN
- Description** : Welcome to our Food Delivery web app repository This project offers a modern and efficient solution for ordering and delivering fruits and vegetables online. With a user-friendly interface and intuitive navigation, you can easily manage your orders. The responsive design ensures a seamless experience across all devices. Our tech stack includes React, Redux, and Bootstrap for the frontend, Node.js and Express.js for the backend, MongoDB for the database, and JWT for authentication
- Title** : **Aarogya Sathi** - Medical Portal for Personalized Healthcare Management
- Platform** : J2EE (Spring Boot), ASP. NET, React, MySQL
- Description** : Aarogya Sathi is a medical portal which facilitates preserving patient medical history, appointment scheduling with doctors, and downloading diagnosis report filled by doctors. Patients can schedule appointments with doctors and view their medical history, doctors have the facility for analysing the medical history through search option helping them for efficient treatment and admin has rights to manage all the operations using responsive UI using React. Implemented JWT-based authentication and role-based authorization for security, along with session management and form validations. Additionally, replicated the project using MS.NET for comparison and versatility.

## Strengths

- Good Leadership Skills.
- Excellent Management Skills.
- Ability to work in Team.
